

### **Problem 3 – Electrica Admin**

#### **Statement**

A company that delivers electricity requires a software system that will allow the management of clients and invoices (The price of energy is fluctuating).

The program will allow:

- a) adding of a new subscribe/client (name and address);
- b) adding the monthly index counter for a subscriber;
- c) listing the current invoices (and possible penalties or pending payment) of the subscribers.

#### **To do**

- Design and implement a Java application for the given statement problem.
